

CFD simulation in human airways and vessels

Prof. Alexandre Marconi de Souza da Costa

7-8 Febbraio 2019

Ore 9:00-14:00

Università di Roma «Tor Vergata»
Aula C12 Macroarea di Ingegneria
Via Politecnico 1, Roma

This course will give a brief introduction to the computational fluid dynamics science and technology in the context of the medical engineering. A hands on training (ANSYS Student Free version) will demonstrate the technology applied to simulations of IAQ (indoor air quality) and human air/blood flows.
